

## EDITORIAL COMMENTS

The editorial board of the *Global Review of Library and Information Science (GRLIS)* is once again delighted to bring to you the volume 17, No.2 edition of the journal. This is in line with our policy change in frequency from annual to biannual publication. This issue, like the previous ones, has a good mix of high quality empirical, opinion and theoretical papers. After a thorough peer review process, 17 papers were selected and included in this issue. The editorial board of the journal is grateful to all who have contributed to this edition and have patiently waited for it.

Articles in this issue, like previous ones cover many aspects of library and information science, especially on novel areas. These include papers on library and information services to the blind and visually impaired, roles of libraries in entrepreneurship education as tool for economic growth in Nigeria, collections care in public libraries, preventive information security mechanisms for combating pharming attacks on the websites, collaboration in improving students' information literacy skills in the digital environment, public library services for attainment of Sustainable Development Goals (SDG), automation impact of Artificial Intelligence (AI) In library services delivery, information delivery services for distance education programmes, adoption and use of web 2.0 tools virtual library and information service provision through mobile devices, management and utilization of indigenous knowledge materials, smart technology and artificial intelligence in libraries.

There are indeed many interesting papers in this issue than have been highlighted here. We have no doubt that these articles will meet the multifarious teaching, learning, and research interests of Library and Information professionals and students as we invite you to take time to savor this varied menu of professional literature.
